Andrii Tatarnykov
PHP Backend/CMS developer

My name is Andrii Tatarnykov, I am a PHP/CMS/Framework Backend developer with over 2 years of development experience. I am engaged in the creation of sites based on WordPress, OpenCart and other CMS. I add the necessary functionality to existing projects (optimization of the site, changing and customizing existing functionality, setting up and installing basic SEO). I have extensive experience in developing unique components for the site. Namely: functionality from scratch, improvement and optimization of ready-made solutions, development of individual functional modules and plugins.

WORK EXPERIENCE

PHP Backend/CMS developer
FiveForDog

02/2021 - 02/2022

I have been working in this company since the beginning of 2021 as a PHP Backend/CMS developer. Engaged in the development and support of projects implemented on the WordPress CMS. Refinement, depending on the wishes of the client, individual plug-ins on the site. Correction of errors and optimization of existing sites. Implementation of site functionality of any complexity specifically for the client, from creating custom filters for products and taxonomies to working with various APIs.

PHP/CMS Backend, JS/HTML/CSS Frontend developer
SMO UTC

02/2021 - 06/2021

Worked with this company on the basis of project cooperation. Performed tasks that the company's full-time developers could not cope with. Conducted training for front-end developers and gave advice on the implementation of the back-end component of sites. Fixed errors related to the inexperience of developers and brought sites to an acceptable level (both cleanliness of the code and ease of use for the user). Implemented separate functional modules for the site (mainly under WooCommerce).

PHP Backend/CMS developer + JS Fronten
NetLab - Creative studio

04/2019 - 09/2019

In this company, he was engaged in the development of a backend component for sites implemented on different CMS (WordPress, Joomla). He was engaged in writing add-ons for WooCommerce plugins and the like. Developed solutions based on various APIs for specific customer requirements. My responsibilities also included the development of the Frontend component of the site.
